

It's heartbreaking to hear about people who have to surrender their pets due to financial difficulty. Job loss, disability, pet medical costs – all have the potential to put your pet ownership at risk. However, there are steps all pet parents can take NOW to minimize the chance that you will have to give up a loved companion animal in the scenarios above. The time to act is before a crisis hits. The following tips and resources can help you **prepare in advance** if you need to look for housing or if your pet experiences medical issues.

### **Pet Friendly Housing Tips**

Take advantage of resources such as [Pet Friendly Housing](#), a national directory of Pet Friendly apartments when looking for properties to rent. The Humane Society of the United States also provides information on [Finding Animal Friendly Apartments](#).

### **Help with Pet Medical Bills**

Coping with your pet's medical issues is stressful enough without having to worry about how or if you can afford to pay for their care. Again, the time to prepare is before you need to pay for care. Follow the simple suggestions below to help defray and cope with medical costs.

- Start a savings account for emergency veterinary care. Even \$5 per week can add up to a significant amount.
- Spay and neuter all your pets and practice good routine preventative care, including necessary vaccinations, heart worm and flea prevention.
- Keep your cats indoors to prevent injuries and diseases

If, despite your best planning efforts, your veterinary bills are piling up, ask your veterinarian if you can work out a payment plan. You can also contact your local shelter. Some shelters operate or know of local subsidized veterinary clinics or veterinary assistance programs.

While there are some groups that provide funding to pet owners for medical emergencies, many of these organizations have income limits or other approval criteria so be prepared to share your income and other information as you apply for help. You should also be aware that many are restricting grants or refusing new applications because their sources of funding are not robust.

We cannot emphasize enough that you should plan ahead for pet vet bills and start a pet emergency savings account. Just \$5 a week – about the cost of a high end coffee drink, would provide over \$250 after one year.

Finally, please note that PET SAVERS is providing these links for information purposes only and we DO NOT endorse or derive any revenue from any of these groups. Please read each of these organizations' information carefully and do your own research before making any decisions.
